

Intel® Teach Elements Facilitation

Looking for free course content that you can integrate into your online or face-to-face professional development program? Intel® Teach provides facilitation materials for Intel® Teach Elements courses.

The facilitation materials promote a deeper experience for teachers as they work through an e-learning course.

Intel offers two options for facilitation materials:

[Register Here to Download Facilitation Materials or Request a License Agreement >](#)

Facilitation Delivery Options	Course Access	Eligibility
<p>Option 1: Register to download a Facilitation Guide (PDF)</p> <p>Intel provides a Facilitation Guide that includes general facilitation strategies along with prompts for discussions, small group work, and sharing.</p>	<p>You and your participants will access the e-learning course at www.intel.com/education/elements or order free CDs</p>	<p>Individuals and Education Agencies</p> <p>Each Facilitator must register and accept the terms of use to download the Facilitation Guide.</p>
<p>Option 2: Request a License Agreement to host course materials in your Web environment.</p> <p>Intel provides a location to download the e-learning course files and online facilitation script. Intel also provides a link to a sample online course to use as a reference in developing a course in your organization's LMS environment.</p>	<p>You integrate a course into your Learning Management System or host it in your education portal.</p> <p><i>NOTE: Intel does not provide technical support. You are responsible for loading, hosting, and maintaining the course.</i></p>	<p>Education agencies that offer professional development to K-12 teachers. Following a simple application and approval process, an individual with sufficient permissions, capacity, consents and authority to enter into a license agreement on behalf of the qualified agency signs the license agreement. Intel will grant a two-year, renewable and royalty-free license for use of the facilitation materials and e-learning content.</p>

With small group discussions and sharing of ideas in action plans, a facilitated experience builds professional learning communities around project-based learning.

- Facilitation content is flexible with several optional activities. You can modify or add your own activities.
- Course format is a local design decision. You may deliver a facilitated course fully face-to-face, fully online, or as a hybrid that incorporates both face-to-face and online delivery.
- Length of a facilitated course is flexible and determined by your program needs. While the total facilitation content covers 8 hours, there are sample schedules the facilitator may choose to follow or adapt.
- You are permitted to use this content and charge reasonable fees for delivering your course, with the understanding that teachers will receive continuing education credit, based on local requirements.
- Upon completion of a course, Intel asks that you report the number of teachers.
