

Eco-Sense Office Buildings

Personal Office Energy Manager - POEM

Sustainable, net-zero energy office buildings are becoming a reality. Engaging building occupants in energy efficiency goals is essential to achieving optimal energy efficiency and building comfort. The Personal Office Energy Manager supports holistic building environmental management by implementing this user-centric approach. Users are provided a view of their personal energy 'footprint' within the building and a comparison against others, creating a social awareness of energy & environment. Personal Office Energy Manager uses pervasive ambient & energy sensing.
