Citrix and Intel – Intelligent Infrastructure

Evolving Compute Models

Citrix XenDesktop with FlexCast

Citrix XenClient Built for Intel vPro Technology

XenClient – designed in collaboration with Intel

XenClient perfectly leverages the Intel® vPro™ platform

Hardware assisted virtualization with Virtualization Technology (VT)

Secure integrity of hypervisor with Trusted Execution Technology (TXT)

Remote management with Active Management Technology (AMT)

Intel vPro – the best platform for virtual desktops for mobile users

Citrix XenClient Bare Metal Hypervisor

- Type 1 client hypervisor
- Bare-metal performance
- Built on 64-bit Xen technology
- Runs multiple virtual desktops simultaneously
- Provides secure isolation of virtual desktops

Citrix & Intel – Better Together

Citrix and Intel provide the BEST end-to-end approach to systems management

Citrix leverages Intel's industry-leading platform solutions to provide the most scalable solutions for virtualization

Providing joint solutions that make highly centralized, optimized and virtualized computing a reality
