

Desktop  
Management:  
Smart, Secure,  
and Simple

# Customer success

"Given the nature of work we do, performance and manageability is paramount. We were looking for a virtual desktop solution that could leverage the machines we already owned as well as new, high performance machines we were planning to procure. MokaFive's BareMetal Player installed easily and worked great, where other client hypervisors we tried failed to even install. With this new baremetal option, MokaFive is now a single, complete solution that can cover nearly everything we need."

# Client management for today's business

Secure the Business.

# Only computing solution...

to provide a

## **rich experience**

- Online or offline
- High performance
- Fast response

across

## **all types of machines.**

- Mac or PC
- Desktops or laptops
- Personal or corporate-owned

# Even better on Intel's intelligent clients

## 1. Mobility and Performance

- Online or offline execution on intelligent clients
- High performance execution on Intel Core Processors (Intel VT, Turbo Boost, Hyper-Threading)
- Improved user interaction through integrated Intel HD Graphics

## 2. Better Manageability and Control

- Policy based management for all x86 machines – Mac, Windows, Linux
- Centralized control for – provisioning, de-provisioning, maintenance and disposal
- Better security through Intel VT-enabled isolation

## 3. Reduced Cost

- Intelligent clients deliver lower TCO by eliminating need for heavy backend
- Central control and standardization lowers management costs
- Local execution improves productivity

# MokaFive on Intelligent Clients Delivers Results

## Cost Reduction

45% reduction  
in TCO

---

60% reduction in  
support costs

---

90% reduction in  
servers versus  
that of VDI

---

100% reduction in  
hardware cost  
with BYOC

## Risk Mitigation

Eliminate  
user tampering by  
enabling personal  
space

---

Reduce  
risk of lost laptop

---

Ensure  
compliance with  
lockdown

## Business Alignment

Minutes  
to onboard a new  
employee
