Intel® Server Board SAI2 and Winbond Hardware Doctor* Audible Alerts Setting.

Information in this document is provided in connection with Intel products. No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in Intel's Terms and Conditions of Sale for such products, Intel assumes no liability whatsoever, and Intel disclaims any express or implied warranty, relating to sale and/or use of Intel products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right. Intel products are not intended for use in medical, life saving, or life sustaining applications. Intel may make changes to specifications and product descriptions at any time, without notice. The **Products Affected** may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Products Affected

Product	Product Code
Server Board SAI2 - Boxed	SAI2
Server Board SAI2SCSI – Boxed with SCSI Adapter	SAI2SCSI
Server Board SAI2 - OEM	BAIBB

Description

The audible alert option provided in the Winbond Hardware Doctor* utility does not work on the server board SAI2.

Root Cause

The root cause is that the server board SAI2 has not enabled the circuitry to allow audible alerting.

Corrective Action

Intel has evaluated a proposed circuitry change to allow audible alerting on the server board SAI2 and has found that the audible alert functionality does not operate in a controlled manner during boot. As a result, Intel has decided not to implement the audible alerting function. An updated version of the Winbond Hardware Doctor utility that removes the option to enable audible alerting will be available at <http://support.intel.com/support/motherboards/server/SAI2/> in WW08.
