Scenario

Intel® Entry Storage System SS4000-E

System Back-up and Recovery Made Easy

Intel® Entry Storage System SS4000-E

The Small Business Challenge

As a small business owner, you need to know that valuable business and customer data will be readily available when you need it. You may have multiple PCs, each of which contains critical data, this can be even important if you have a mobile workforce. Employees using notebooks to access inventory and client files are especially vulnerable to data loss, theft or interruptions in connectivity.

When a PC or notebook crashes, critical company data can be lost and productivity drops significantly. Events such as viruses, worms, and even disgruntled employees can interrupt your operations. Getting your small company back online immediately is critical to customer satisfaction and your ability to grow your business in the future.

PC Imaging Enable Quick Recovery

The Intel® Entry Storage System SS4000-E with the accompanying Client Backup and Recovery application can create an image of each PC, which is then stored on the Networked Attached Storage device. If a mobile or desktop PC crashes,

your employees can boot their system remotely from the image stored on the SS4000-E. The PC image can be restored, and your employees are up and running quickly.

Because data changes frequently, these PC images can be automatically updated regularly to ensure that restored data is as current as possible. These back-up capabilities ensure data is preserved now and in the future, keeping your employees more productive and your business more competitive in today's fast-paced markets.

Store More. Protect More. Save More.

Organizations today are inundated with data. From email and word processing to file retention and disaster recovery planning, this influx of data has resulted in an increased need for storage.

The Intel® Entry Storage System SS4000-E is an intelligent network storage system for small office, medium office, and home network environments. Contact us today for more information.
