

**Intel P24D/486DX4/DX4 ODP (PENTIUM OVERDRIVE)**

\* A regulator board may be needed when using these CPUs. Please refer to page 2-7 for its installation.

**NOTE :** P24D has a similar appearance with A80486DX2-66, except Date Code. P24D, with a mark "W5VIX," supports Write-Back mode for the CPU's internal cache.
