

An Example of Fan Installation

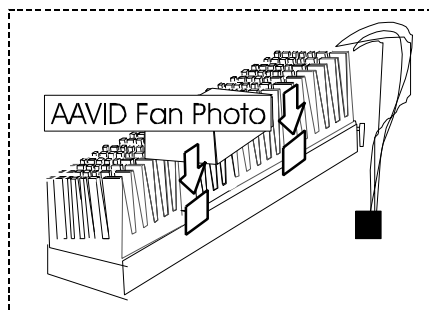

1. The photo below shows a CPU cartridge and an AAVID heatsink with CPU fan. Two hooks (the white arrow heads pointed) are used to fasten the heatsink with the cartridge.

2. As the arrow heads point, two ends of the hooks are inserted on the corresponding holes on the CPU cartridge.

3. Push these two ends of the hooks to insert into the corresponding holes on the cartridge.

4. Push the other ends of the two hooks in the direction of the arrow head to complete these installation.
