FIC has always been dedicated to providing system integrators with solutions that enable customers to deliver more options to their customers. The P4M-RS350 is the world's finest IGP solution and makes use of ATi's new 9100 IGP graphics technology to deliver stunning integrated graphics performance at a unparalleled value.

The FIC Condor is also ideal for system integrators looking for the ultimate in ease of integration. This sleek and stylish mini gaming system breaks all the traditional chassis boundaries with it's easy access single touch flip down case, which provides instant access to the side mounted motherboard. Boasting more features and expandability then competing Small Form Factors the Condor is the perfect system to brand.

Few manufactures can deliver a total solution, but FIC can. Whether it is a motherboard, graphics card, barebones, or complete system…you can be sure that FIC has a solution that will meet your unique requirements.

FIC and ATi deliver more performance, flexibility, and value with the 9100 IGP based P4M-RS350

"Integrated graphics" may have been a dirty word in the past, but that's all about to change with the new FIC P4M-RS350. Making use of the latest 9100 IGP form ATi, this graphics powerhouse harnesses the full potential of today's cutting edge Intel Celeron & Pentium 4 Processors, and delivers industry leading graphics performance! This motherboard delivers a wealth of features including 4DIMM sockets, 3 PCI slots for expandability, TV Out, SATA, IEEE1394, and 10/100LAN! All these features plus high an high quality integrated graphics processor deliver more performance, flexibility, and value then ever.

The P4M-RS350 is poised to be the most powerful integrated solution for system integrators, OEM's, and DIY consumers. The multimedia features make it the ideal integrated solution for cost effective Media Center Edition PC's. It's "all-in-one" value includes capabilities for advanced video features, networking, 6 channel sound, DVD acceleration, and USB 2.0 connectivity. This is the most comprehensive solution for maximum benefit to end users and integrators alike.

Designtechnica reviews the FIC Condor and "it does not disappoint"

You've seen the reviews, countless media are hailing the FIC Condor as "truly innovative" and a "breath of fresh air in SFF design." Designtechnica specializes in reviews of products that benefit consumer's hi-tech lifestyles, and recently explored the ins and outs of the Condor. Here's what they had to say:

"One cool feature about the FIC Condor is how you access the inside of the system. By sliding a button forward on the top of the system, the FIC Condor opens like a suitcase revealing the components on the inside. This feature is reminiscent of the old Apple G4 tower systems and how they would open. This makes it easy to build a system based on the Condor and easy to upgrade"

"FIC has always been on the forefront of design and the Condor does not disappoint. Very innovative design, plenty of room for hardware components, and good cooling"

### FIC's new ATi based AE X600XT Video card takes graphics to the next level

The FIC AE600 XT takes graphics to new visual heights and fully supports PCI Express™ technology. Armed with the ultimate clock speeds the RADEON the AE600 XT gives you the ability to send and receive data simultaneously at twice the speed of current AGP 8X solutions.

This card is the ideal choice for serious gamers looking for the right balance of value and performance. The AE X 600 XT's brand new graphics memory interface delivers incredible frame rates that allow for a highly responsive and smooth game-play experience and is fully compatible with Microsoft?DirectX?9.0 to ensure you are ready for all the action today and with tomorrow's titles.

Basic Specifications:

- Graphics Engine: Ati Radeon X600 XT
- Video Memory: 128MB DDR
- Core/Memory Clock: Engine Clock 500MHz / memory Clock 370MHz / 400MHz RAMDAC
- Memory Interface: 128-bit DDR Memory Interface
- Maximum 3D Resolution: Max. Resolution 2048x1536
- Bust Type: PCI Express
- Display Support: Supports DVI, VIVO, Video-Out

About First International Computer, Inc.

Founded in 1980, First International Computer, Inc (FIC) is a world leader specializing in the design and production of motherboards, ATi based graphics cards, PC systems, servers and notebooks. As a highly flexible and adaptable company, FIC is firmly established in the OEM/ODM markets. A leading supplier for many of the industry's leading PC brand names, FIC also offers a comprehensive range of products and solutions designed specifically for the distribution market.

All the latest information about FIC and its complete line of products can be

found at www.fic.com.tw or by contacting mkt@fic.com.tw.
