intel.

Quick Start Card
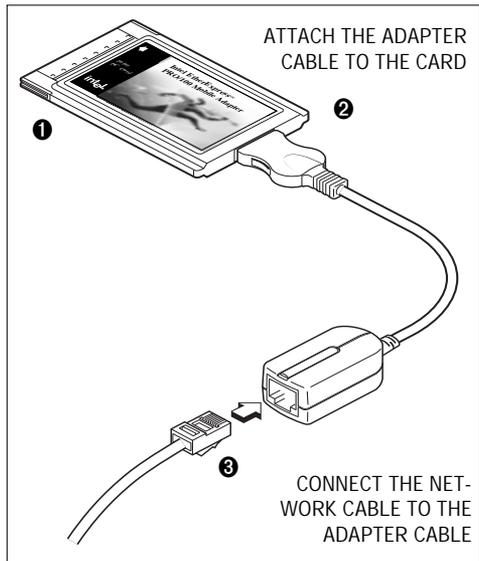

EtherExpress™ PRO/100 Mobile PC Card

Use these instructions to install the PRO/100 PC Card under Windows 95*
Windows 3.x, Windows for Workgroups, or Windows NT.* For MS-DOS
without Windows or for IBM OS/2,* see **Chapter 2, Software Installation** in
the *User's Guide*.

1. Windows 95

*Start your computer first and let
Windows 95 run.* With the Intel
logo on top and the arrow on the
label facing into your computer,
insert the card in a PC Card
(PCMCIA) slot. Push until the
card is firmly seated. Go to step 2.

ATTACH THE ADAPTER
CABLE TO THE CARD

CONNECT THE NET-
WORK CABLE TO THE
ADAPTER CABLE

1. Windows 3.x

Do not start your computer. With
the Intel logo on top and the arrow
on the label facing into your
computer, insert the card in a PC
Card (PCMCIA) slot. Push until
the card is firmly seated.

2. Attach adapter cable to card

As shown, attach the adapter cable to the card and push in lightly. Note position
of Intel logo.

3. Connect network cable to adapter

As shown, attach the network cable RJ-45 connector to the PRO/100 PC Card
RJ-45 cable receptacle.

4. Install the drivers for your operating system

Windows 95: See section below.

Windows 3.x and Windows for Workgroups: See section below.

Windows NT 4.0: Choose Control Panel, Network, Adapters, Add, and Have Disk. Insert the Intel Network Drivers Disk and click OK. Click Close to finalize the installation. Restart the computer when prompted.

Windows 95 Driver

- If Windows 95 detects the PRO/100 PC Card, proceed to the next bullet point. If it does not, first click on the PC Card (PCMCIA) icon in the Control Panel to enable PC Card services, then go to the next bullet point.

- If prompted for a manufacturer's disk, insert the Network Drivers Disk and follow the instructions on screen. Restart the computer when prompted.

Windows 3.x and Windows for Workgroups: Run the Intel Installation program to install drivers

- Start computer and Windows OS.
- Insert Disk 1, Installation Disk, into your diskette drive.
- From the Program Manager, choose File/Run. In the Command Line box, type **A:SETUP**. Press Enter or click OK.
- Highlight your network operating system and click OK.
- Complete the steps prompted by the Installation Program, then proceed to **Chapter 2, Software Installation** in the *User's Guide*. Find your network operating system in the **alphabetical listing** under **Installing Network Software** in Chapter 2. Follow the procedures shown to complete the installation. If prompted for a manufacturer's disk, insert disk 2, Network Drivers Disk.
